**INVESTMENTS**

**Total Pool Assets**

\$1.13 billion (Endowment Pool), \$2.33 billion (total foundation assets) as of March 31, 2023.

**Pool Objective**

Prudent investment of funds to provide real growth of the assets over time while protecting the value of the assets from undue volatility or risk of loss. Managed on a total return basis (i.e., yield plus capital appreciation) while taking into account the level of liquidity required to meet withdrawals from the pool - mainly expenses and grants to external organizations. While the Investment Committee recognizes the importance of the preservation of capital, they also adhere to the principle that varying degrees of risk are generally rewarded with commensurate returns over full market cycles (5-10 years).

2 – Performance is preliminary and at times estimated pending final reporting from all investments. Managers often report on substantial lags, particularly private illiquid investments. In the instances where we do not have actual or estimated performance for a manager, we default to a 0% performance. Investment performance is presented net of investment expenses, including fund manager incentive fees

3 – Includes cash in transit to or from investments. For example, 2/28 cash could include money that is being sent to an investment on 3/1

4 – Current portfolio allocations may be outside of strategic ranges as it can take substantial time to adjust investments to meet range goals. This is particularly true for private illiquid investments that call capital into strategies over time and typically necessitate multi-year periods to gain exposure for appropriate vintage diversification

5 – Investment expense ratio approximates weighted-average 1.17% excluding fund manager incentive fees
