<sup>1</sup>Includes escalation of 2.8 percent for all construction phases programmed for fiscal years 2027/28 and 2028/29.

<sup>\*\*</sup>Actual match amount is determined by the match rate percentage. Dollar amount is listed for estimate purposes.

<sup>†</sup> Pre-award authority requested.

1. Applicant requested additional funding; however, the award has been reduced to reflect revised cost estimates and increased local match. The total project cost is \$79.75 million for CON. The total M2 grant plus local match is \$76.25 million; an additional \$5.60 million to come from local sources (Rancho Mission Viejo). Applicant original request was submitted as one CON phase; however, the award has been programmed across three fiscal years as the project will be delivered in three distinct segments to close the existing gap between Cow Camp Road and Ortega Highway. With funding programmed in FY26/27 for Segment 2C-2, FY27/28 for Segment 2D-1, and FY28/29 for 2D-2, applicant will be required to award three separate CON contracts with individual timely use of funds deadlines and project final reports.

2. Applicant original request was submitted under the ACE Program. Project moved under the FAST Program due to project scope improving connections to the Interstate 405 interchange. Applicant initially requested less funding; however, the award has been increased to reflect eligibility of Caltrans oversight fee due to FAST improvements requiring Caltrans coordination.

3. Applicant requested additional funding; however, the award has been reduced to reflect the eligibility of project components, primarily the removal of a Class I bike facility. Additionally, the match rate was revised in accordance to the impact fee report. Total project cost is \$8.03 million. The total M2 grant plus local match is \$4.39 million; an additional \$3.64 million to come from local sources.

4. Applicant requested additional funding; however, the award has been reduced to reflect refinements to the revised cost estimate.
