Dear OCTA Board,

I've been a resident of Irvine for 10 years now and I used to take the Metrolink from Tustin station to San Bernardino station to visit my parents when I was attending UCI. I've graduated now and work from home. I try to take Metrolink and Amtrak trains for longer distance trips like to DTLA, Santa Barbara, San Diego, and Corona but the infrequency and the slow speed even compared with rush hour traffic prevents it from being a good alternative to driving 95% of the time. If this maintenance facility supports Metrolink in improving its level of train service then I wholeheartedly support approving of its construction.

Thank you,  
Kyle Brodie
