SUBJECT: SCRRA Request for Adoption of the Authority's FY 2022-23 (FY23)

Budget

On May 27, 2022, the SCRRA Board approved the transmission of the Proposed FY23 Budget for your consideration and adoption. The Board further approved the transmission of the Forecast Operating Statement for years FY24, YF25, FY26 and FY27 for your re-

view and programming.

The FY23 Budget Operating Revenue is projected to be \$64.0M while the Operating Expenses are projected to be \$296.6M. The total Operating Support requested from Member Agencies is \$232.6M. Operating expenses will continue to be supported by CARES/ARPA/CRRSAA as funding is available. The FY23 Capital Program includes \$94.4M for Rehabilitation, \$12.1M for New Capital, and \$102.5M (\$5.9M of which is expected from Member Agencies) for Rolling Stock replacement.

As we navigate through the financial challenges presented by the pandemic and continue our ridership recovery efforts in the post-COVID "new normal", and the changes to work patterns, staff will be monitoring Ridership recovery, Farebox Revenues and Expenses very closely. The first quarter financial report will provide a thorough analysis of the current situation and our estimates of near-term performance, with recommendations for actions to deal with real-time conditions.

The Proposed FY23 Budget documentation, which was presented at the AFCOM Committee on May 13, 2022, and at the Board of Directors Meeting on May 27, 2022, is attached for your review. It includes:

- Board Item # 7A Approved at the Board of Director's Meeting on May 27, 2022
- Board item # 7A attachments, which includes:
 - Attachment A Ridership Recovery Forecast

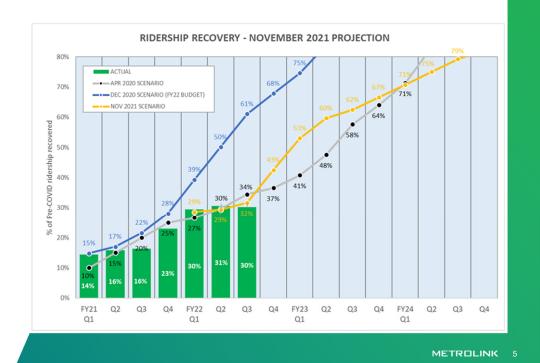

- Attachment B FY23 Proposed Operating Budget with Comparison to FY22
- Attachment C Historical Actual and Budgeted Operating Statements
- Attachment D FY23 Proposed Operating Budget by Member Agency
- o Attachment E FY23 Proposed Operating Budget by Line

The cost estimate includes the following considerations and assumptions: 1) The estimated costs to repair are based solely on visible damages during the inspection and engineering estimations made accounted for anticipated hidden damages. 2) The estimated costs to repair is to restore the cars to an "as-new condition" for revenue service. 3) The estimated costs to repair do not consider internal structural, air piping, cabling damages due to inaccessibility during the visual inspection, however, engineering assumptions were made to estimate likely hidden damages. 4) The estimate costs to repair do not consider underfloor air piping and cabling damages due to inaccessibility during the visual inspection, however, engineering assumptions were made to estimate likely hidden damages. 5) The estimated costs to repair does not include "non-recurring engineering cost" and production setup cost. 6) Engineering costs are a rough order of magnitude and do not account for influences such as market forces. 7) Market Adjustments: STV report says \$5M but it is almost 5 years old. Considering 7% of market price increase for 7 years, it is \$5.35M. 8) Additional Adjustments: STV report does not include structural inspection and repair. Due to the heavy accident, it will require engineering analysis on the structural integrity to ensure its road-worthy – estimation is \$2M, including engineering consultant and actual repair. 10% for internal costs.	8,000,000	3,800,000	1,584,000	888,000	1,152,000	576,000

CHAKLADARA	2456	Capital	ALL	AII	NA	NA	NA	Information Technology	AGENCYWIDE CYBERSECURITY IMPLEMENTATION	Cyber threats have proliferated and have become more sophisticated over the years. Most organizations have a dedicated cybersecurity team led by a CISO (Chief Information Security Officer). A Cybersecurity Manager was approved in the FY22 budget, however the position once hired, will not have a dedicated team of cybersecurity experts. Instead, the Cybersecurity Manager will have to rely on several part-time resources from the Infrastructure, Networking and HelpDesk teams in the IDTS team. This project aims to build a cybersecurity framework, monitor evolving security threats, build a mitigation strategies for incidence management, and proactively harden the security posture of the agency from cyberthreats. The project envisions deploying contract services and software and hardware products.	439,000	208,525	86,922	48,729	63,216	31,608			
STEWARTM	2476	Capital	ALL	All	NA	NA	NA	Facilities	FACILITY (CMF)	Improvements to the CMF have a system-wide impact through improving the functionality, productivity, and overall demand for fleet inspection, service, repair, storage and rehabilitation. Additionally, Metrolink has committed to the CMF Action Plan, which promises continuous improvements to ensure Metrolink is a good neighbor. This budget request will allow Metrolink to design the CMF projects identified in the CMF Modernization Study effort. Modernizing the 30-year-old CMF will increase the operational efficiency of the facility because the improvements identified through the CMF Modernization Study effort will bring the facility up to date with safety, technological improvements, addition work platforms, cranes, tables use of Wi-Fi and improve layouts for warehousing parts. Many of the projects that would increase operational efficiency of maintenance activities also contribute to addressing the community concerns by reducing the number of idling locomotives in the yard and the duration of their idling reducing the noise and emissions from locomotives. Due to the limitations of the property situated between San Fernando Road and the LA River which is built out with the current buildings and tracks and the need to maintain service while any project is constructed there are some limitations to the improvements that can be made and any construction to the existing site and buildings needs carefully planned staging plans.	3,721,000	1,767,475	736,758	413,031	535,824	267,912

Metrolink has committed to the CMF Action Plan, which promises continuous improvements to ensure Metrolink is a good neighbor. This budget request will allow Metrolink to advance an additional sound barrier at CMF. Following a successful demonstration of steel sound barriers at the service and inspection track (pilot barriers face the Elysian Valley community), additional sound barriers will be installed on the other side of the servicing area to dampen the noise generated by idling locomotives. This investment has been repeatedly requested by the Cypress Park community.	515,000						515,000

4 VEGAR	2570	76 Ca	apital	ALL AII	NA	Worn	High		MANAGEMENT (EAM) IMPROVEMENT PROJECT - PHASE II	Metrolink is building out the use of Trapeze Enterprise Asset Management System (EAM) as part of an effort to consolidate a series of standalone asset management systems into a single repository in a phased approach. The Metrolink Board approved a single source procurement back in May 2021 with Trapeze Software Group to add 2 new modules, optimization, implementation services, and Organizational Change Management as part of Phase I for \$1.5M. While Phase I (Project No. 519093) has been launched in FY2022, staff anticipates the project timeline will extend beyond the current fiscal year and into FY2023. As staff works to deliver Phase I of this EAM Improvement Project, there is a possibility of potential change orders that will be needed. Approximately \$200K of this budget request would be a placeholder in the capital budget for any unexpected consulting services, interfaces, customization, and configuration needs. Furthermore, Phase II would include the purchase of additional licenses and modules, implementation services, additional Organizational Change Management support, and other expenses as needed. The modules included in Phase II include: Application Interface Programming (API), Telematics, Mobile Focus Enterprise, Network Restrictions, Linear Visualization, and Illustrated Parts Catalog. This new phase will also require the support of a project management consultant, agency staff time, and project reserve at a similar percentage as budgeted for Trapeze EAM Phase I. In addition to building out the use of its prominent EAM System; Metrolink staff is also exploring software solutions that can be integrated in its EAM system to support prescriptive rail maintenance and allow the agency to measure the life extension and cost savings from rail grinding, milling and friction management allowing Metrolink to make well-informed investment decisions. The agency is seeking a software solution that will provide track engineering data, economics, and physics-based models that can be easily integrated into capital p	1,700,000	807,500	336,600	188,700	244,800	122,400

This project request is for replacement of the MP36 fleet with new Tier 4 locomotives. (Agency is pursuing the goal to fund with grants up-to 94.3% with Member Agency contribution of 5.7%. This project proposal #2479 covers the first 10 out of a total of 15 locomotives with a 5.7% Member Agency contribution of \$5.82M out of this total \$102.52M funding request. The Agency has already secured \$51.6M in Carl Moyer grant funding for this project.
