### **Beach Boulevard Corridor Study**

In October 2018, the Orange County Transportation Authority, in partnership with the local agencies and the California Department of Transportation District 12, initiated the Beach Boulevard Corridor Study to identify multi-modal transportation solutions for enhancing local and regional mobility along the corridor. Beach Boulevard is approximately 21-miles long, north to south arterial that traverses through the following nine Orange County local jurisdictions: Anaheim, Buena Park, Fullerton, Garden Grove, Huntington Beach, La Habra, Stanton, Westminster, and the County of Orange.

As part of the study process, a technical working group was established and includes technical representatives (city engineers, planners, and public works directors) from each of the corridor cities, the California Department of Transportation, and the County of Orange. To date, the technical working group has provided technical input, local perspectives, public outreach support, and assisted in shaping the draft alternatives. A summary of progress to date, draft alternative concepts, and next steps are presented as information for the Board of Directors.
